Index Volume 58 1990/91

No. 1 pp. 1–134 issued on 30.08. 1990
No. 2 pp. 135–230 issued on 20.09. 1990
No. 3 pp. 231–340 issued on 18.10. 1990
No. 4 pp. 341–464 issued on 15.11. 1990
No. 5 pp. 465–568 issued on 03.12. 1990
No. 6 pp. 569–668 issued on 09.01. 1991
No. 7 pp. 669–778 issued on 15.02. 1991
No. 8 pp. 779–894 issued on 28.03. 1991

Aziz, A.K., Lemmert, R., Schneider, M.: A finite element method for the nonlinear tricomi problem 95

Bank, R.E., Bürgler, J.F., Fichtner, W., Smith, R.K.: Some upwinding techniques for finite element apprixomations of convection-diffusion equations 185
Baranger, J., Najib, K.: Analyse numerique des ecoulements quasi-Newtoniens dont la viscosite obeit a la loi puissance ou la loi de carreau. *Numerical analysis of quasi-Newtonian flow obeying the power law or the Carreau flow* 35
Barlow, J.L.: Error analysis of a pairwise summation algorithm to compute the sample variance 583
Batterson, S.: Convergence of the shifted QR algorithm on 3×3 normal matrices 341
Begumisa, A., Robinson, I.: Suboptimal Kronrod extension formulae for numerical quadrature 807
Bourquin, F.: Analysis and comparison of several component mode synthesis methods on one-dimensional domains 11
Bürgler, J.F., → Bank, R.E., et al.

Cai, Z.: On the finite volume element method 713
Chandler, G.A., Sloan, I.H.: Spline qualocation methods for boundary integral equations 537
Chui, C.K., Diamond, H.: A General framework for local interpolation 569

Das, P.C., → Saha, S., et al.
Dekker, J., Kraaijevanger, J.F.B.M., Schneid, J.: On the relation between algebraic stability and *B*-convergence for Runge-Kutta methods 230
Diamond, H., → Chui, C.K.
Dörfler, W.: The conditioning of the stiffness matrix for certain elements approximating the incompressibility condition in fluid dynamics 203
Durán, R.: Superconvergence for rectangular mixed finite elements 287
Dyn, N., Micchelli, C.A.: Interpolation by sums of radial functions 1
Dziuk, G.: An algorithm for evolutionary surfaces 603

Eggermont, P.P.B., Saranen, J.: L^p estimates of boundary integral equations for some nonlinear boundary value problems 465
Eicke, B., Louis, A.K., Plato, R.: The instability of some gradient methods for ill-posed problems 129

Fichtner, W., → Bank, R.E., et al.
Funaro, D., Heinrichs, W.: Some results about the pseudospectral approximation of one-dimensional fourth-order problems 399

Govaerts, W.: Bordered augmented linear systems in numerical continuation and bifurcation 353

Hairer, E., Ostermann, A.: Dense output for extrapolation methods 419
Hairer, E., Iserles, A., Sanz-Serna, J.M.: Equilibria of Runge-Kutta methods 243
Heinig, G., Jankowski, P.: Parallel and superfast algorithms for Hankel systems of equations 109
Heinrichs, W., → Funaro, D.
Helton, J.W., Spain, P.G., Young, N.J.: Tracking poles and representing Hankel operators directly from data 641

Iserles, A., → Hairer, E., et al.

Jankowski, P., → Heinig, G.

Kishore, N.N., → Saha, S., et al.
Kraaijevanger, J.F.B.M., → Dekker, J., et al.
Kratz, W., Peyerimhoff, A.: A numerical algorithm for the Stokes problem based on an integral equation for the pressure via conformal mappings 255
Kress, R.: A Nyström method for boundary integral equations in domains with corners 145

Lanzkron, P.J., Rose, D.J., Szyld, D.B.: Convergence of nested classical iterative methods for linear systems 685
Lemmert, R., → Aziz, A.K., et al.
Louis, A.K., → Eicke, B., et al.
Lubich, C.: On the convergence of multistep methods for nonlinear stiff differential equations 839

Mandel, J.: On block diagonal and Schur complement preconditioning 79
Marek, I., Szyld, D.B.: Comparison theorems for weak splittings of bounded operators 387
Matos, A.C.: Acceleration methods based on convergence tests 329
Micchelli, C.A., → Dyn, N.
Morgan, A.P., Sommese, A.J., Wampler, C.W.: Computing singular solutions to nonlinear analytic systems 669

Najib, K., → Baranger, J.
Negrón Marrero, R.V.: A numerical method for detecting singular minimizers of multidimensional problems in nonlinear elasticity 135
Nevanlinna, O.: Power bounded prolongations and Picard-Lindelöf iteration 479
Niezgódka, M., Sprekels, J.: Convergent numerical approximations of the thermomechanical phase transitions in shape memory alloys 759

Ortega, T., Sanz-Serna, J.M.: Nonlinear stability and convergence of finite-difference methods for the "good" Boussinesq equation 215
Ostermann, A., → Hairer, E.

Peherstorfer, F.: Gauss-Tchebycheff quadrature formulas 273
Peyerimhoff, A., → Kratz, W.
Pitonyak, A., Shi, P., Shillor, M.: On an iterative method for variational inequalities 231
Plato, R., → Eicke, B., et al.

Qun, L.: Fourth order eigenvalue approximation by extrapolation on domains with reentrant corners 631

Reusken, A.: Steplength optimization and linear multigrid methods 819
Rieder, A.: The wavelet transform on Sobolev spaces and its approximation properties 875
Riele, H.J.J. te: A new lower bound for the de Bruijn-Newman constant 661
Riemenschneider, S., Scherer, K.: Cardinal hermite interpolation with box splines II 591
Robinson, I., → Begumisa, A.
Rose, D.J., → Lanzkron, P.J., et al.

Sacchi Landriani, G., Vandeven, H.: A multidomain spectral collocation method for the Stokes problem 441
Saha, S., Das, P.C., Kishore, N.N.: A shape-optimization technique for the capillary surface problem 737
Sanz-Serna, J.M., → Hairer, E., et al.
Sanz-Serna, J.M., → Ortega, T.
Saranen, J., → Eggermont, P.P.B.
Scherer, K., → Riemenschneider, S.
Schild, K.H.: Gaussian collocation via defect correction 369
Schneid, J., → Dekker, J., et al.
Schneider, M., → Aziz, A.K., et al.
Schneider, R.: Stability of a spline collocation method for strongly elliptic multidimensional singular integral equations 855
Shi, P., → Pitonyak, A., et al.
Shillor, M., → Pitonyak, A., et al.
Shroff, G.M.: A parallel algorithm for the eigenvalues and eigenvectors of a general complex matrix 779
Sloan, I.H., → Chandler, G.A.
Smith, R.K., → Bank, R.E., et al.
Sommese, A.J., → Morgan, A.P., et al.
Spain, P.G., → Helton, J.W., et al.
Sprekels, J., → Niezgódka, M.
Stewart, D.: A high accuracy method for solving ODEs with discontinuous right-hand side 299
Stewart, G.W., Zhang, G.: Eigenvalues of graded matrices and the condition numbers of a multiple eigenvalue 703
Sweet, D.R.: Fast block Toeplitz orthogonalization 613
Szyld, D.B., → Lanzkron, P.J., et al.
Szyld, D.B., → Marek, I.

Thomann, J.: Resommation des series formelles. Solutions d'équations différentielles linéaires ordinaires du second ordre dans le champ complexe au voisinage de singularités irrégulières. *Resummation of formal series. Solutions of second order linear complex ordinary differential equations near singularities* 503

Vandeven, H., → Sacchi Landriani, G.

Wampler, C.W., → Morgan, A.P., et al.

Young, N.J., → Helton, J.W., et al.
Yserentant, H.: Two preconditioners based on the multi-level splitting of finite element spaces 163

Zeníšek, A.: The finite element method for nonlinear elliptic equations with discontinuous coefficients 51
Zhang, G., → Stewart, G.W.
